Microporous and Mesoporous Materials 23 (1998) 369–370

MICROPOROUS AND MESOPOROUS MATERIALS

Contents

In situ IR spectroscopic study of the adsorption behaviour of ethylbenzene and diethylbenzenes related to ethylbenzene disproportionation over HY zeolite
N. Arsenova, H. Bludau, W.O. Haag and H.G. Karge 1
Cyclic polyols: a new class of structure-directing agents? Study of inositol in the synthesis of FAU- and LTA-type zeolites
B. De Witte, J. Patarin, D. Le Nouen, L. Delmotte, J.L. Guth and T. Cholley 11
Composite microporous compounds. Part I: Synthesis and structure determination of two new vanadium alkyldiphosphonates (MIL-2 and MIL-3) with three-dimensional open frameworks
D. Riou, O. Roubeau and G. Férey 23
Crystal structure of a hydrogen sulfide sorption complex of fully Ca^{2+}-exchanged zeolite X
S.B. Jang, M.S. Jeong, Y. Kim, Y.W. Han and K. Seff 33
Reactions of alcohols with hydrogen sulphide on zeolites. Part 7: the effect of Brønsted acidity of faujasite type zeolites on methanol hydrosulphurisation
M. Ziolek, J. Czyzniewska, J. Kujawa, A. Travert, F. Mauge and J.C. Lavalley 45
Hydrothermal synthesis of laumontite, a zeolite
H. Ghobarkar and O. Schäf 55
Partial oxidation of methane to syngas with or without simultaneous CO_2 and steam reforming reactions over Ni/$AlPO_4$
V.R. Choudhary, B.S. Uphade and A.S. Mamman 61
Synthesis, characterization and structure determination of a new fluorogallophosphate (Mu-5) prepared in the presence of 1,4,8,11-tetraazacyclotetradecane
T. Wessels, L.B. McCusker, C. Baerlocher, P. Reinert and J. Patarin 67
Synthesis of $AlPO_4$-5 in a microwave-heated, continuous-flow, high-pressure tube reactor
I. Braun, G. Schulz-Ekloff, D. Wöhrle and W. Lautenschläger 79
Conventional and microwave-assisted crystallization inclusion of substituted rhodamine derivatives in $AlPO_4$-5
M. Bockstette, D. Wöhrle, I. Braun and G. Schulz-Ekloff 83
The intercalation of phenylphosphonic acid in layered double hydroxides
H. Nijs, A. Clearfield and E.F. Vansant 97
Twelve-ring pockets on the external surface of MCM-22 crystals
S.L. Lawton, M.E. Leonowicz, R.D. Partridge, P. Chu and M.K. Rubin 109
The synthesis of zeolites under micro-gravity conditions: a review
E.N. Coker, J.C. Jansen, J.A. Martens, P.A. Jacobs, F. DiRenzo, F. Fajula and A. Sacco, Jr. 119
Patents Report 137
Newsbrief 149
The influence of acid sites on intracrystalline diffusivities within MFI-type zeolites
T. Masuda, Y. Fujikata, T. Nishida and K. Hashimoto 157
Synthesis and characterization of a new titanium silicoaluminophosphate: TAPSO-37
N. Jappar, Y. Tanaka, S. Nakata and T. Tatsumi 169
The chemical vapour and liquid deposition of tetraethoxysilane on the external surface of ZSM-5
R.W. Weber, K.P. Möller, M. Unger and C.T. O'Connor 179

^{1}H NMR studies of the adsorption of water on silicalite
V.V. Turov, V.V. Brei, K.N. Khomenko and R. Leboda 189
Monoclinic $NaZnPO_4$-ABW, a new modification of the zeolite ABW structure type containing elliptical eight-ring channels
H.Y. Ng and W.T.A. Harrison 197
Monte Carlo simulation of coke formation in zeolites
X.-Y. Guo, Z.-W. Liu and B. Zhong 203
Characterization of mordenites treated by HCl/steam or HF
K.-H. Lee and B.-H. Ha 211
Amine-directed syntheses and crystal structures of phosphate-based zeolite analogs
P. Feng, X. Bu, T.E. Gier and G.D. Stucky 221
Product selectivity and aromatics distribution in aromatization of propane over H-GaMFI zeolite: influence of temperature
V.R. Choudhary and P. Devadas 231
Newsbrief 239
Theoeretical study of the physical adsorption of aspirin on natural clinoptilolite
A. Lam, L.R. Sierra, G. Rojas, A. Rivera, G. Rodríguez-Fuentes and L.A. Montero 247
Synthesis of microporous titanosilicate ETS-10 from $TiCl_3$ and TiO_2: a comprehensive study
J. Rocha, A. Ferreira, Z. Lin and M.W. Anderson 253
Characterization of alumina–titania mixed oxide supports. Part II: Al_2O_3-based supports
A. Gutiérrez-Alejandre, M. González-Cruz, M. Trombetta, G. Busca and J. Ramírez 265
Isolation and characterization of a novel lamellar-type aluminophosphate, $AlPO_4$-L, a common precursor for $AlPO_4$ molecular sieves
N. Venkatathri, S.G. Hegde, V. Ramaswamy and S. Sivasanker 277
Synthesis of a faujasite thin layer and its application for SO_2 sensing at elevated temperatures
M. Osada, I. Sasaki, M. Nishioka, M. Sadakata and T. Okubo 287
Investigation of sorption and transport of sorbate molecules in crystals of MFI structure type by iodine indicator technique
M. Kočiřík, J. Kornatowski, V. Masařík, P. Novák, A. Zikánová and J. Maixner 295
Molecular sieving with amorphous monodisperse silica beads
A. Walcarius, C. Despas and J. Bessière 309
Amine-templated syntheses and crystal structures of zeolite rho analogs
P. Feng, X. Bu and G.D. Stucky 315
Synthesis and crystal structure of feldspar analogs in beryllosilicate and aluminum–cobalt phosphate systems
X. Bu, P. Feng, T.E. Gier and G.D. Stucky 323
The role of matrix embedding on the properties of steamed mordenites
Z.M.M. Noronha, J.L.F. Monteiro and P. Gélin 331
